Precision & SanSwiss quality

Cadura is the new line of . It combines sophisticated design, ergonomics of details and the highest quality materials with brand new functionalities.

The Cadura shower enclosures combine remarkable style with functionality at the highest level, designed and made with meticulous attention to each detail. It's a proposal for those who appreciate comfort and expect sophisticated style.

The inspiration for designing the series was flexibility of the life-giving ingredient which is water. This natural element, its depth and uncontrollable strength inspired our architects to create extremely ergonomic and functional solutions of our latest CADURA line.

SanSwiss shower enclosures combine comfort, functionality, design and reliability in compliance with European standards.

The application of strict procedures, together with all the reliability tests and regular material checks, ensure that the quality of the products is maintained at the highest level.

The importance of the details

The combination of carefully selected raw materials with Swiss precision resulted in creating series characterized by pure design and high functionality solutions. The smooth and delicate but still very expressive line of extremely original fittings brings to mind the smoothness of a sheet of ice, making it the distinctive element of our CADURA project.

It's a modern, original design of fittings and an ergonomic and extremely modern handle, 6 mm tempered safety glass covered with Aquaperle anti-plaque glass-coating, and **the «Soft Open/Close» system** in sliding door models, guarantee extremely easy use.

This new system allows the sliding door to open and close smoothly and safely, thus preventing the door from slamming shut. The sliding system is concealed by a rail for a sleeker and more fashionable design.

Hinges with contemporary and trendy curves.

A sophisticated design for an ergonomic and elegant handle.

Sliding walk-in CAW2: ideal for hard-to-reach areas.

Creative thinking

The new series of SanSwiss shower enclosure is a reflection of sophisticated style and unrestrained nature of water. Its natural spontaneity and vitality is precisely SanSwiss CADURA.

The brand-new ergonomic handle, designed on the basis of the latest trends, is not only extremely attractive but above all functional and convenient to use.

Walk-in CAT4+CAT3

Walk-In CAT3 + CAT4: fixed wall with compensating wall profile + additional fixed wall (wall mounted)
